

## **International Training Workshop on Small Hydro Power Development July 7 - 17, 1997**

The primary objective of the workshop was to enhance the knowledge of the professionals working in the field of power on the vast potential of tapping the hydel resources of the State, most efficiently with minimum damage to the environment. The workshop was also intended to impart knowledge of the latest techniques for the development of small, mini and micro hydel projects nationally and internationally.

The Training Workshop on Small Hydro Power was organized by the Center at Technopark, Trivandrum from 7 to 18 July 1997. The faculty for the training workshop consisted of two experts, Prof. Zhu Qiang and Mr. Kong Changcai from IN-SHP. Twelve Indian experts from MNES, IREDA, CWRDM, KSEB, EMC-K, Equipment Manufacturers and Private Consultants with exposure at national and International levels were also invited to be the faculty of the workshop.

The participants to the two week training workshop consisted of engineers from KSEB, SILK, District Panchayaths, ANERT, Voluntary organizations, IREDA, state nodal agencies for renewable energy development, and from various IPPs and Consultants from all over India. The training workshop consisted of tutorial sessions, case study presentations, discussions and field visits.
