GREEN HYDROGEN PATHWAYS TO SUSTAINABLE FUTURE

In alliance with the anchoring of Energy Observer - the first vessel powered by renewable energies and hydrogen to the Kochin shore, the Energy Management Centre is organizing a National Workshop on 'Green Hydrogen - Pathways to Sustainable Future' from 15th- 17th November 2022. Developed in France, this Hydrogen based yacht has been sailing for more than five years as a laboratory for the ecological transition. It has been conducting stopovers in various cities around the globe. As the first stopover of 'Energy Observer' in India, the yacht is dancing with the tides of Kochi.

The workshop includes presentations and panel discussions on different themes. Scientists and Subject experts from Energy Observer, France will partake in and lead the program. An expo of Green Hydrogen Technologies is also set for enlightening the participants

GREEN HYDROGEN PATHWAYS TO SUSTAINABLE FUTURE

3 DAY NATIONAL WORKSHOP

Themes for panel discussion

Day - 1 15/11/2022 - Green Hydrogen Production & Storage

Day - 2 16/11/2022 - Green Hydrogen for Transportation

Day - 3 17/11/2022 - Green Hydrogen in Industries

ENTRY TO THE WORKSHOP IS LIMITED
THROUGH REGISTRATION.
